DETAILED ACTION

1. Receipt is acknowledged of the "conditional" request for RCE application is acceptable and a RCE has been established. An action on the RCE follows.

Election/Restrictions

2. Applicant's response to the restriction requirement under the heading "Remarks" filed on 4/21/05 has been acknowledged. In light of the Applicant's arguments the reasons are persuasive and, therefore, the Examiner withdraw the species restriction requirement of claims 14-20. However, upon further review pending claims 8-20, Applicants are required to elect one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 8-13, drawn to method for forming a connection, classified in class 29, subclass 852.
- II. Claims 14-20, drawn to method for forming a connection within a multi layer circuit board, classified in class 156, subclass 155.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as by using an adhesive layer for coupling a top surface of the dielectric member and a second pre circuit assembly. See MPEP § 806.05(d).

Further, Inventions I and II are also related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require a particular step of: attaching the second pre circuit to the adhesive layer, etc., of the subcombination. The subcombination has separate utility such as forming one hole through the first pre circuit assembly in a desired location such as a connection to the conductive core member is desired to be formed, etc.,

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3729

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
